Acknowledgments

Not applicable.

Funding

This work was supported by the Wuhan Industrial Innovation Joint Laboratory for High-end CNC Systems, Huazhong University of Science and Technology (Project No. 2024010902040450).

CRediT author contributions

Min Wu: Conceptualization; Formal analysis; Methodology; Software; Visualization; Writing - original draft; Writing - review & editing.

Huicheng Zhou: Methodology; Validation; Writing - review & editing.

Zifang Hu: Conceptualization; Supervision; Writing - review & editing.

Chao Wang: Resources; Project administration; Writing - review & editing.

Weihao Li: Methodology; Validation; Writing - review & editing.

Data and code availability

The supplementary material includes saved trajectories, selected models, reference paths and result-verification scripts. Additional code and figure source files are available from the corresponding author on reasonable request.
